

ASRS Launches new Online Registration for Member Meetings

The ASRS is pleased to announce a new online feature in which members may register on our website for member group meetings beginning in 2012.

This new online system means members will no longer have to call the ASRS to register to attend meetings offered at our Phoenix and Tucson offices, or our limited meetings held throughout the state in the spring.

The online registration feature is available now to register for our 2012 meetings. (A limited number of meetings are still scheduled for 2011; members interested in attending any of these – listed on our homepage calendar – will need to contact the ASRS directly.)

To register for a meeting online, members must be logged in to their secure homepage. If you have not yet registered for your own ASRS secure homepage, you may do so by selecting the Login Here button at the bottom of our homepage. The registration process only takes a few minutes and will give you access to a host of personal information, including benefit estimates, your beneficiaries and more.

Once registered, members may select Member Meetings in the left navigation tab to view schedules of upcoming meetings, and register for any meetings they'd like to attend. You'll receive confirmation emails to notify you of your successful registration.

The ASRS offers three types of group meetings. Hosted by one of our benefit advisors, these meetings offer members a chance to learn about our programs and benefits, ask questions and interact with fellow members.

Planning for Retirement – For members planning to retire within three years. Information presented includes pension benefit calculations, options for retiree health insurance and more.

Know Your Insurance – For members retiring soon. Information presented includes an overview of the ASRS health insurance plans and benefit, an opportunity to meet benefit providers and more.

Retire Now - This meeting is vital for members who are planning to retire within four months. Information presented includes your individual pension benefit estimate, options for retiree health insurance, return to work options and more. Members who attend this meeting will receive a personal benefit estimate and assistance in completing the proper paperwork.
